

The Wallarah 2 Coal Project falls under Schedule 1 of State Environmental Planning Policy (Major Projects) 2005. As such, if the Minister for Planning is also satisfied that it meets this definition, it will be a project to which Part 3A of the Environmental Planning and Assessment Act 1979 applies.

The Part 3A approval is the most significant approval required for the Project. If this approval is obtained, it is expected that all other statutory approvals necessary for the Project will be able to be procured.
